Organizational Title Abbreviations

- In order to standardize abbreviations for reporting purposes (Biographic Profiles, Service Record Cards, etc.)

  PMCD needs your assistance and approval of organizational abbreviations.

  for computer input purposes. Abbreviations are limited to five (5) characters (no slashes permitted) and are to be applied only to those organizational titles indicated by a red check mark on the attached register. Where PMCD has attempted to provide the abbreviations, please verify their validity. For all others checked you should provide an acceptable abbreviation.
- 2. Please return to OP/PMCD, Room 625, Chamber of Commerce Building by 22 October 1971.
  - 3. If you have any questions concerning the above, please contact on extension

MEMORANDUM FOR THE RECORD

PROJECT: STAFFING

SUBJECT: Implementing the new Military Occupational Speciality

(MOS) Codes in the current Staffing System

A. One of the remaining data items that has to be converted in the current Staffing System prior to the implementation of the Human Resources Systems (HRS) is the MOS code. This item will replace the current Occupational Series Codes on all military positions identified in the system today.

Because of various computer edits that currently exist both in the Personnel and Staffing systems today, it is impossible to implement these codes as initially designed without a tremendous programming effort in both systems.

Realizing the limitations that are unique to each of the current systems, the following conversion effort will be implemented that will allow for an orderly computer conversion to take place when the new Human Resources Systems are implemented.

- Position Management and Compensation Division (PMCD/OP) will reclassify the occupational series code and position titles on all military positions utilizing a condensed version of the new MOS code (see attachment), and the complete version of the associated occupational title.
- 2. Military and Mobilization Personnel Division (MMPD/OP) will utilize the <u>new</u> occupational title only, on all future Request for Personnel Actions (Form 1152) for all Agency military personnel. During the interim period until the new HRS systems are implemented, MMPD will utilize the <u>old</u> occupational series codes that are currently in use today in conjunction with the new titles.
- 3. Transaction and Records Branch/OP will update their manual Table of Organization accordingly with the Form 261's issued by PMCD, and the Form 1152's from MMPD.

Approved For Release 2001/08/07: CIA-RDP78-07181R000200010009-7

SECRET

#### Approved For Release 2001/08/07: CIA-RDP78-07181R000200010009-7

PMCD will incorporate the new MOS codes and occupational titles in a special military section of the Agency's Occupational Code Handbook which is currently under revision.

MMPD will forward any new changes in MOS codes or occupational titles to PMCD, utilizing the form that has been designed, so the Agency Occupational Code Handbook and related positions can be updated accordingly.

The above has been coordinated with all components involved.

B. The above technique will be utilized on all MOS codes to be incorporated in the current T/O system. Unfortunately it cannot be utilized in the current personnel system since there are many computer edits in various computer programs that are checking for all numerics in occupational codes.

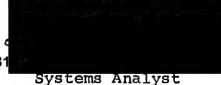

This will, however, provide the Office of Personnel the capability to reclassify the occupational codes and titles on all military positions, and occupational titles only on military personnel records over an extended time period that should be completed prior to conversion to the new Human Resources Systems. It will also provide a unique method, which does not exist today, of identifying these codes that MMPD utilizes on both their Military and Agency personnel actions.

When computer conversion takes place, a program will be written to:

- 1. Reconvert the MOS codes on positions back to their original design, reinserting the zero in the 6th position, etc.
- 2. Convert the occupational code in the computer record of all military personnel to the same occupational code of the military position that they incumber.

Approximately 8% of the military personnel in the Agency are currently assigned to non-military (i.e., GS) positions, Development Complement, or Pending Reassignment status. The computer records of these personnel will not be updated automatically. A report listing will be prepared identifying these personnel so 'Personnel Actions' can be prepared assigning their new MOS codes.

25X1A

OCS/SIPS Task Force

Condensed Version of Military Occupational Speciality Codes (MOS) for use in the current Staffing System

The new MOS code is defined as being seven characters in length. Initially the sixth character will always be a zero (0) since the expansion capability incorporated in the design of the code will not be used.

Realizing the above and also that any occupational code utilized in the current system(s) must contain a decimal point (.) in the fifth position, the following technique will be utilized to permit the use of the new codes and titles in today's system(s).

- A. The sixth character (zero) of all new MOS codes will not be used.
- B. The existing fifth character will be moved to the sixth character's position
- C. A decimal point will be placed in the fifth character's position.

#### For example:

			1	2	3	4	5	6	7	<u>Title</u>
1.	New MOS code as currently defined	=	A	1	0	4	5	0	1	Pilot,Transport
2.	The 6th character deleted	= .	A	1	0	4	5		1	n .
3.	The 5th char moved to 6th char position	=	A	1	0	4		5	1	· n
4.	Placement of decimal point in 5th char position		A	1	0	4	•	5	1	n E

5. Code A104.51 will be utilized in the current system
